PROFESSIONAL SUMMARY

Senior Mobile Engineer with 8+ years of experience specializing in high-performance hybrid applications for iOS and Android. Expert in React Native and Expo, with advanced proficiency in Swift and Kotlin for native module integration. Proven track record of leading technical teams and delivering 15+ complex products across Blockchain, FinTech, AgTech and HealthTech industries.

TECHNICAL SKILLS

- **Mobile Core:** React Native (CLI/Expo), Native Modules (Swift/Kotlin), Redux & Redux-Toolkit, MobX, Zustand.
- **IDE's:** Cursor, XCode, Android Studio.
- **Languages:** TypeScript, JavaScript (ES6+), Swift, Kotlin.
- **Infrastructure & Tools:** Firebase(Crashlytics, Analytics, Messages), Sentry (Monitoring), Auth0, Okta, GraphQL, Apollo, AWS Amplify, Cognito.
- **Testing & Deployment:** Jest, React Native Testing Library, Expo EAS, AppCenter, CI/CD.

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer | Blockdaemon

Apr 2024 – Dec 2025

Remote - US

- Ported a native iOS application to a cross-platform solution using React Native with Expo, achieving feature parity in 4 months.
- Integrated custom native modules in Swift and Kotlin to bridge secure functionalities into the React Native environment.
- Developed a secure approver application for institutional wallets leveraging Multi-Party Computation (MPC).
- Managed migration from Okta to Auth0 SSO and upgraded Expo SDK from v51 to v54.

Lead Mobile Engineer | Mecena

Jun 2023 – Oct 2023

Remote - EU

- Led a team of two Senior Developers in building a FinTech application for content creators.
- Defined the mobile architecture using a layered approach, with extensive use of custom hooks, i18n, and implemented private login flows.
- Built animated brutalist UI components (Reanimated v3) and contributed to a design system following atomic design principles.

Senior Mobile Engineer | DevBase

Apr 2023 – Jun 2023

Remote - US

- Maintained and implemented features for an e-commerce app for technicians using JS and TypeScript.
- Fixed UI bugs across JavaScript and TypeScript while the app was mid-migration to TypeScript.

Senior Mobile Engineer | Coderio

Apr 2022 – Oct 2022

Remote - EU

- Developed a surfing industry app with 70+ screens, integrating public weather APIs, OAuth integrations and Stripe payments.
- Integrated OAuth login/account creation with Google, Facebook, and Apple; also integrated Stripe SDK for payments.

Lead Mobile Engineer | DEPT*Sep 2021 – Apr 2022**Remote - US*

- Led a team of 3 Senior Engineers to build a hydroponics startup client from the ground up.
- Acted as first engineer, making all core architecture and stack decisions.
- Drove alignment through recurring product and stakeholder meetings with the client's Product Owner.

Mobile Engineer | Paisanos*Sep 2017 – Sep 2021**Buenos Aires, AR*

- Delivered over 10 mobile applications for FinTech, AgTech, and Healthcare using React Native.
- Performed major React Native version migrations (v0.51 to v0.59) using RN Upgrade Helper.
- Adapted quickly across a high-rotation project environment, ramping into different products and requirements.

Full Stack Engineer | Bits0*Dec 2016 – May 2019**Buenos Aires, AR*

- Developed two mobile applications from the ground up using React Native with Expo and Redux.
- Built a comprehensive mobile solution for an aesthetic medical center, including features for discounts, coupons, and reservations.
- Developed and maintained a backend system using PHP and MySQL to support mobile REST APIs.
- Performed maintenance and bug fixing for a domotic system application for intelligent housing.
- Managed manual deployments to both App Store and Google Play Store in the early stages of the Expo ecosystem.
