PROFESSIONAL SUMMARY

Staff Mobile Engineer with 9+ years shipping production iOS and Android apps. Specialist in React Native and the Expo ecosystem (SDK upgrades, Expo Router, EAS), with Swift/Kotlin for native modules. Led cross-platform rewrites and small engineering teams, delivering 15+ products across Blockchain, FinTech, AgTech, HealthTech, and SportsTech.

TECHNICAL SKILLS

- **Mobile Core:** React Native (Expo/CLI), Expo Router, Native Modules (Swift/Kotlin), Redux Toolkit, MobX, Zustand, TanStack Query, MMKV.
- **Languages:** TypeScript, JavaScript (ES6+), Swift, Kotlin.
- **Infrastructure & Tools:** Firebase, Sentry, Auth0, Okta, GraphQL, Apollo, AWS Amplify, Cognito.
- **Testing & Deployment:** Jest, React Native Testing Library, Expo EAS (Build/Submit/OTA), App Store & Play Console, Bitrise, AppCenter.

PROFESSIONAL EXPERIENCE

Staff Mobile Engineer (Fractional) | iPlayMe2

Jan 2026 – Present

Remote - US

- Led a full rewrite of a production racket-sports app from React Native CLI (0.72) to Expo SDK 54 (RN 0.81), shipping feature parity to the App Store and Play Store in under 6 months.
- Owned mobile architecture and delivery (team of 2): Expo Router, Dev Client/prebuild, config plugins, Redux Toolkit + TanStack Query, MMKV, and Sentry.
- Designed and implemented CI/CD migration from Bitrise to Expo EAS Build/Submit across three environments (dev/UAT/prod).
- Drove platform quality post-migration, cutting crash rate by 89% versus the legacy app; set engineering standards and hired/onboarded the co-engineer.

Senior Mobile Engineer (Full-time) | Blockdaemon

Apr 2024 – Dec 2025

Remote - US

- Ported a native iOS application to a cross-platform solution using React Native with Expo, achieving feature parity in 4 months.
- Integrated custom native modules in Swift and Kotlin to bridge secure functionalities into the React Native environment.
- Developed a secure approver application for institutional wallets leveraging Multi-Party Computation (MPC).
- Managed migration from Okta to Auth0 SSO and upgraded Expo SDK from v51 to v54.

Lead Mobile Engineer (Full-time) | Mecena/Selfers

Jun 2023 – Oct 2023

Remote - EU

- Led a team of two Senior Developers in building a FinTech application for content creators.
- Defined the mobile architecture using a layered approach, with extensive use of custom hooks and i18n and implemented private login flows.

- Built animated brutalist UI components (Reanimated v3) and contributed to a design system following atomic design principles.

Senior Mobile Engineer (Full-time) | DevBase

Apr 2023 – Jun 2023

Remote - US

- Maintained and implemented features for an e-commerce app for technicians using JS and TypeScript.
- Fixed UI bugs across JavaScript and TypeScript while the app was mid-migration to TypeScript.

Senior Mobile Engineer (Full-time) | Coderio

Apr 2022 – Oct 2022

Remote - EU

- Developed a surfing industry app with 70+ screens, integrating public weather APIs, OAuth integrations and Stripe payments.
- Integrated OAuth login/account creation with Google, Facebook, and Apple. Also, integrated Stripe SDK for payments.

Lead Mobile Engineer (Full-time) | DEPT

Sep 2021 – Apr 2022

Remote - US

- Led a team of 3 Senior Engineers to build a hydroponics startup client from the ground up.
- Acted as first engineer, making all core architecture and stack decisions.
- Drove alignment through recurring product and stakeholder meetings with the client's Product Owner.

Mobile Engineer (Full-time) | Paisanos

Sep 2017 – Sep 2021

Buenos Aires, AR

- Delivered over 10 mobile applications for FinTech, AgTech, and Healthcare using React Native.
- Performed major React Native version migrations (v0.51 to v0.59) using RN Upgrade Helper.
- Adapted quickly across a high-rotation project environment, ramping into different products and requirements.

Full Stack Engineer (Full-time) | Bits0

Dec 2016 – May 2019

Buenos Aires, AR

- Developed two mobile applications from the ground up using React Native with Expo and Redux.
- Built a comprehensive mobile solution for an aesthetic medical center, including features for discounts, coupons, and reservations.
- Developed and maintained a backend system using PHP and MySQL to support mobile REST APIs.
- Performed maintenance and bug fixing for a domotic system application for intelligent housing.
- Managed manual deployments to both App Store and Google Play Store in the early stages of the Expo ecosystem.
