PROFESSIONAL SUMMARY

Staff Mobile Engineer with 9+ years shipping iOS and Android apps to production. Specialist in React Native and the Expo ecosystem (SDK upgrades, Expo Router, EAS), with Swift/Kotlin for native modules. Led cross-platform rewrites and small engineering teams, delivering 15+ products across Blockchain, FinTech, AgTech, HealthTech, and SportsTech.

TECHNICAL SKILLS

- **Mobile Core:** React Native (Expo/CLI), Expo Router, Native Modules (Swift/Kotlin), Redux Toolkit, MobX, Zustand, TanStack Query, MMKV.
- **Languages:** TypeScript, JavaScript (ES6+), Swift, Kotlin.
- **Infrastructure & Tools:** Firebase, Sentry, Auth0, Okta, GraphQL, Apollo, AWS Amplify, Cognito.
- **Testing & Deployment:** Jest, React Native Testing Library, Expo EAS (Build/Submit/OTA), App Store & Play Console, Bitrise, AppCenter.

PROFESSIONAL EXPERIENCE

Staff Mobile Engineer (Fractional) | iPlayMe2

Jan 2026 – Present

Remote - USA

- Led the full rewrite of a production racket-sports app from React Native CLI (0.72) to Expo SDK 54 (RN 0.81), reaching feature parity on App Store and Play Store in under 6 months.
- Owned mobile architecture and delivery (team of 2): Expo Router, Dev Client/prebuild, config plugins, Redux Toolkit + TanStack Query, MMKV, and Sentry.
- Designed and implemented the CI/CD migration from Bitrise to Expo EAS Build/Submit across three environments (dev/UAT/prod).
- Drove post-migration platform quality, cutting crash rate 89% vs. the legacy app; defined engineering standards and hired/onboarded the co-engineer.

Senior Mobile Engineer (Full-time) | Blockdaemon

Apr 2024 – Dec 2025

Remote - USA

- Migrated a native iOS app to a cross-platform React Native + Expo solution, achieving feature parity in 4 months.
- Integrated custom native modules in Swift and Kotlin to bridge secure functionality into the React Native environment.
- Built a secure approval app for institutional wallets using Multi-Party Computation (MPC).
- Led the Okta → Auth0 SSO migration and upgraded the Expo SDK from v51 to v53.

Lead Mobile Engineer (Full-time) | Mecena/Selfers

Jun 2023 – Oct 2023

Remote - EU

- Led a team of two Senior developers building a FinTech app for content creators.

- Defined the mobile architecture with a layered approach, extensive custom hooks, i18n, and private sign-in flows.
- Built animated brutalist UI components (Reanimated v3) and contributed to a design system following atomic design principles.

Senior Mobile Engineer (Full-time) | DevBase

Apr 2023 – Jun 2023

Remote - USA

- Maintained and shipped features for an e-commerce app for technicians using JS and TypeScript.
- Fixed UI bugs in JavaScript and TypeScript while the app was mid-migration to TypeScript.

Senior Mobile Engineer (Full-time) | Coderio

Apr 2022 – Oct 2022

Remote - EU

- Built a surf-industry app with 70+ screens, integrating public weather APIs, OAuth, and Stripe payments.
- Integrated Google, Facebook, and Apple sign-in/sign-up; also integrated the Stripe SDK for payments.

Lead Mobile Engineer (Full-time) | DEPT

Sep 2021 – Apr 2022

Remote - USA

- Led a team of 3 Senior engineers to build the client for a hydroponics startup from scratch.
- First engineer on the project, owning all core architecture and tech-stack decisions.
- Aligned via recurring product and stakeholder meetings (client Product Owner).

Mobile Engineer (Full-time) | Paisanos

Sep 2017 – Sep 2021

Buenos Aires, AR

- Shipped 10+ mobile apps for FinTech, AgTech, and Healthcare using React Native.
- Executed major React Native version upgrades (v0.51 to v0.59) using RN Upgrade Helper.
- Adapted quickly in a high-churn project environment, ramping into different products and requirements.

Full Stack Engineer (Full-time) | Bits0

Dec 2016 – May 2019

Buenos Aires, AR

- Built two mobile apps from scratch using React Native with Expo and Redux.
- Delivered an end-to-end mobile solution for an aesthetic medicine center, including discounts, coupons, and bookings.
- Developed and maintained a PHP + MySQL backend powering mobile REST APIs.
- Maintained and bug-fixed a home-automation app for smart dwellings.
- Managed manual App Store and Google Play Store releases in the early Expo ecosystem.
